### QUESTION 1

You need to load flight information provided by **70-487** Consolidated Messenger.

What should you use?

- A. Office Open XML
- B. COM interop
- C. OleDbConnection and OleDbDataReader
- D. EntityConnection and EntityDataReader

Correct Answer: C

```
Answer Area
public void Sync()
{
    var sendStream = SendStream();
    var receiveStream = ReceiveStream();
    var local = LoadLocal();

    local.WriteXml(sendStream, XmlWriteMode.DiffGram);
    local.ReadXml(receiveStream, XmlReadMode.DiffGram);
}
```

### QUESTION 2

Historical flight information data will be stored in Windows Azure Table Storage using the FlightInfo class as the table entity. There are millions of entries in the table. Queries for historical flight information specify a set of airlines to search and whether the query should return only late flights. Results should be ordered by flight name.

You need to specify which properties of the FlightInfo class should be **70-487 exam** used at the partition and row keys to ensure that query results are returned as quickly as possible.

What should you do? (Each correct answer presents part of the solution. Choose all that apply.)

- A. Use the WasLate property as the row key.
- B. Use the Airline property as the row key.
- C. Use the WasLate property as the partition key
- D. Use the Arrival property as the row key.
- E. Use the Airline property as the partition key.
- F. Use the Flight property as the row key.

Correct Answer: BF

### QUESTION 3

You need to recommend a data access technology to the contractor to retrieve data from the new data source.

Which data access technology should you recommend?

- A. LINQ to XML
- B. ADO.NET Entity Framework
